

Editor's Comment:

Impact of reject of dairy wastewater into the aquatic environment: case of the Bayo dairy company (Brazzaville-Congo)

The subject treated in this manuscript is of major concern and is globally well conducted.

Yet, before the manuscript be valuably published in IJECC, I would invite the author(s) to make some required improvements to the manuscript:

Please modify the text of your manuscript by carrying at the appropriate places in the text.

* at the beginning of the Conclusion, you write: "This study permits to approve the quality..." I think you actually mean 'assess' instead of 'approve'; so, if the case, please modify the word accordingly.

my positive editorial decision (after performing some required modifications) for manuscript number: 2020/IJECC/54683.
