

Editor's Comment:

The Manuscript titled “ **Antifungal activity and phytochemical screening of *Cymbopogon citratus*, *Cajanus cajan*, and *Plectranthus amboinicus* leaves collected in Guyana, South America**” shows an important area of research where Antifungal activity and phytochemical potential of three plant extracts was analyzed. It need some improvements which are given as under:

- 1- The formula mentioned in 2.6 CULTURE TECHNIQUE need to be formatted correctly
- 2- Figures of Box plots need to be explained in figure legends.
- 3- Figures of Box plots should be formatted correctly.
- 4- Statistical analysis results of data need more explanation
- 5- Conclusion need to be modified. Explanation is needed for the Zones of inhibition exhibited by the plant extracts against which fungus?
- 6- Results section need clear interpretation of results

After incorporating all these points, this article may be considered for publication in the **International Journal of Pathogen Research**.
