

Editor's Comment:

I have gone through the reviewers comment and the correction made by the authors. However the editors have their concerns over the manuscripts quality. While some of editors have raised doubts about the manuscripts content, it still deemed acceptable for publication should the authors do the needful amendments and adhering to the journals format (the manuscript is not in acceptable format).

Please refer to the comments made by Dr. Win Myint Oo. I agree with her comments. But not very convinced with the corrections made by the authors. The tables still looks similar to previous version. Is it supposed to be 1(1,7%) or 1 (1.7%)? comma is used throughout.

If authors fulfill the above recommendations the manuscript is acceptable for publication.
