General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Comments are indicated in the review panel of the manuscript. Title can be slightly changed as indicated Abstract: Methods to be summarised since full details are in materials and methods section Results and discussion: There might be a need to have subtitles to show the results clearly before discussion since experiment was factorial. There is a lot of grammatical errors which end up interfering with the quality of the manuscript	Thanks
Minor REVISION comments	There is need to clearly indicate results before discussion. For example first point on results and discussion is discussion before results are mentioned. Reader need to know results first to be able to follow the discussion	
Optional/General comments	Manuscript is scientific and technical but some information not clear due to grammatical errors.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	Thanks
