

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Advances in Research
Manuscript Number:	Ms_AIR_56234
Title of the Manuscript:	Synthesis, Characterization and Antibacterial Analysis of Some Schiff Base Metal (II) complexes
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<ol style="list-style-type: none"> 1. The time units are normally h and min for hours and minutes respectively, but full words are acceptable as far as they are consistent. 2. Suggested item 2, 8, 21, 26 and 27 have not been revised. In particular, item 2 must be followed because one sentence is enough for complex formation and then move on to the Schiff base. This is a scientific article, not an undergraduate textbook. Facts have been known extensively for a complex formation process. 3. The following items are referred to the <u>revised</u> manuscript. 4. Page 2. Line 13 should read "The Schiff base was synthesized by the addition of.." Also the volume unit should be corrected to ml to be consistent. 5. Page 2. Line 13-14. What is n and y? The exact number must be provided. 6. Page 4. Line 13. The equation should be specified as (1). The word "equation" is not necessary. 7. Page 4. Line 20. The equation should be specified as (2). The word "equation" is not necessary. 8. Page 4. Line 22 should read "...which is always 1." 9. Page 5. Line 4 should read "...poured into Petri dishes...." 10. The new conclusion has been well written. 11. After all items have been completely revised, the manuscript should be accepted for the publication.
