PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The average cost of the production of hill banana is 2.04, 873.75 almost 46% of the gross yield, if we cross between the results in table 1 and table 2, we see that the higher cost is related to hired human labor (36%) and the cost related to phytosanitary chemicals is (2.32), while the constraints of pest attack and disease attack are the most thwarted constraints on production activity, the author must explain the implicit relationship between input costs and constraints	
Minor REVISION comments	-I suggest that the author put a map showing the location of the study area. - I invite the author to specify the survey representativeness rate (survey rate). - The author must mention the average area used for the calculation.	
Optional/General comments	This paper aims to assess the economic profitability of hill banana cultivation and the problems faced by farmers in Dindigul district in Tamilnadu.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
