

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Journal of Biochemistry, Genetics and Molecular Biology</a>
Manuscript Number:	Ms_AJBGMB_59387
Title of the Manuscript:	Genetic Analysis Of Tilapia ( <i>Oreochromis niloticus</i> ) Nirwana Strain That Is Cultivated In Aceh Besar And Wanayasa By Using Random Amplified Polymorphic DNA Method
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy> )

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"> <li>The manuscript is written in a technical manner but is not scientific enough. The abstract seems unhelpful as details of the location where the experiments are done, and the quantity of reagents used for PCR seems irrelevant for an abstract. The abstract should indicate the purpose of study and not the flow of the methodology</li> <li>A detailed discussion/ conclusion section that links the purpose of the work with the scientific contribution that indicating the need of the work will be highly appreciated</li> <li>Figure 3, indicates a dendrogram, try using other software like MegaX, iTOL which would indicate the bootstrap value depicting the confidence of the tree</li> </ul>	
<b>Minor</b> REVISION comments	<ul style="list-style-type: none"> <li>Using proper symbols. For e.g. symbol for degrees ° in and not O</li> <li>Grammatically incorrect and spelling check required. e.g. Dendrogram instead of fendrogram and phylogenetic than phylogenic</li> </ul>	
<b>Optional/General</b> comments	<ul style="list-style-type: none"> <li>Increasing the scope of the paper and not limiting it to extracting the data and carrying out the experiments will increase the suitability for this journal.</li> </ul>
