### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The case report is about a very rare type of mesenchymal tumor and is well structured and fluent. But why FNAC and why not a core needle biopsy for more precise informations?. What it means "clinically adequate margins", because at the moment of intervention you didn't have informations about the nature of the tumor? The margins were confirmed to be negative at pathological examination because the recommendation of oncologist was only follow-up? The english language is very good and the references are well chosen and right quoted.	
<b>Minor</b> REVISION comments	----	
<b>Optional/General</b> comments	----	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
