

SDI Review Form 1.6

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_47234
Title of the Manuscript:	ISSUES AND APPLICATION OF LINEARIZED MODELS IN GEOMORPHIC PROPERTIES OF THE IKPA WATERSHED, NIGERIA
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1: Under methods, the author is silent on the regression model and the t-test Carried out. The model should be stated, briefly explained and justified (reasons for the use of the model) This is particularly important as the title of the paper is on linearized models. The paper cannot be complete without such technical touch. 2: Results: Since the author took time to list 3 objectives, it makes sense to present the results in line with such objectives for purposes of understanding and clarity. At the level of results and discussions, we would want to see if the objectives have been achieved and how.	
Minor REVISION comments	Although the paper reads well, there is need to proof read thoroughly for minor issues of grammar and tenses.	
Optional/General comments	This is a good and strong paper, but requires serious touch on the methods (particularly on the models used) and complete overhauling of the results and discussions to agree (strictly) with the earlier stated objectives. Subsections on the result section should not in anywhere use statistical language. For instance, "The Effect of Variation in Independent Variables on the dependent Variable". The independent and dependent variables should have names.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
