PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>There is a structural issue with this paper as it talks about climate change and climate variability interchangeably and you cannot do this, they are different. So it is unclear which is being addressed. The conceptual framework is lacking the underlying theories of perception and adaptation and some of the data is dated.</p> <p>The methodology must be checked as in its current form neither validity nor reliability has been established. Again the population data is dated. The sample frame and size have not been established.</p> <p>The findings were not discussed.</p>	
Minor REVISION comments		
Optional/General comments
