Manuscript Number:	Ms_AJFAR_53325
Title of the Manuscript:	Evaluation of Biochemical Responses of Genetically-Male Tilapia (<i>Oreochromis niloticus</i>) after Replacing fish oil with Plant-based oils in their Diets
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I have made comments in the manuscript in track changes in red ink to assist the author to consider improving the article.	
Minor REVISION comments	While the title starts with "assessment", I believe 'determination' is a better option. A photo of the experimental setup would greatly improve presentation of the design and methodology. Did the author make any effort to measure growth? If so, this should incorporate as it would greatly improve its worth to the end user who might want to link any measurable economic parameter. References need to be updated so that most current ones are selected instead of "old" citations.	
Optional/General comments	This is a good article worth publishing but needs some refinement.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
