

SDI Review Form 1.6

Journal Name:	Asian Journal of Biology
Manuscript Number:	Ms_AJOB_67220
Title of the Manuscript:	Safety evaluation of artemether-lumefantrine-tinidazole on the kidneys of healthy and diseased mice
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This paper examines the effects of artemether-lumefantrine-tinidazole (ALT) on the kidneys in mice. ALT is a treatment for malaria, and this study provides useful information about the side effects in malaria treatment. Although the experimental method is fine, it is not sufficient to examine acute and chronic damage, and this study cannot be directly applied to clinical practice. It would be better if the limitations of this study were mentioned a little more at the end so that it would not be overestimated for adoption.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
