

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Journal of Research in Animal and Veterinary Sciences</a>
Manuscript Number:	Ms_AJRAVS_59515
Title of the Manuscript:	Effect of weaning age on the survival rate and growth performance of rabbits kept in the Western Highlands of Cameroon
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link: <http://www.sciencedomain.org/journal/10/editorial-policy> )

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The subject of the study is current and original. It can be used as a model animal in other farm animals (goat, sheep, cow etc.) by taking the example of the rabbit used as animal material. The subject of study is suitable for the journal.	
<b>Minor</b> REVISION comments	In the study, breeding was made in the cage. I think the free range system can be used as an additional trial group. Therefore, it can be said whether there is a difference between free and cage breeding.	
<b>Optional/General</b> comments	Since the study is original for the region, it will contribute to both commercial production and scientific literature. In particular, providing information about the climatic conditions of the region offers the opportunity to work in different climatic conditions. In addition, each stage of this study is described in detail. Therefore, I think that this study will contribute to the original and new studies.	

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	No (In this study, no procedures such as surgery and slaughter were performed for the rabbit, which is the animal material used in the experimental group. Follow the ethical rules as animal welfare is not affected.)	

**Reviewer Details:**

Name:	Emre Aydemir
Department, University & Country	Akdeniz University, Turkey
