PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p><u>Methodology</u></p> <ul style="list-style-type: none"> - Point 2-2: You did not report the weight of the animals before the tests on arrival as you did for the age. - Instead, give the breed of animals used and specify the type of test feed - Item 2-5: Justify the collection of 2 mL of blood (there are conventional collection standards for weight and species to avoid stressing the animals during the experiment) <p><u>Results and discussion</u></p> <p>Paragraph 1: This paragraph has already been discussed in the methodology (you do not need to revisit this idea)</p> <p>Paragraph 3: Justify the varied level of Moringa for animal feeding according to the work of Ozovehe (2013) and Aderinola et al., 2013</p> <p>Paragraph 4: Review the conclusion regarding the direction of activity (positive and negative) of T1 and T2 diets. The 2 plants do not react in the same way according to your results and discussion.</p> <p>Paragraph 5: Draw a conclusion on this part of the parameter according to the activity of the plant species. This should be done for each parameter to draw a good overall conclusion.</p> <p>Paragraph 7: Avoid the word "but" in a discussion.</p>	
Minor REVISION comments	<p><u>Methodology</u></p> <ul style="list-style-type: none"> - Review the units of Volume and Weight in accordance with international convention (Example: ml in mL) - You don't need to remember the places of purchase and the transport of the animals (no matter) - Point 2-3: For plant species (too many unnecessary sentences such as: place of purchase, harvest, parts of plants not used for food). In fact, a summary of this paragraph is needed and state precisely the part or parts of the plant used (Example: leaves and thin stems) 	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
