

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Research in Biochemistry</a>
Manuscript Number:	Ms_AJRB_71267
Title of the Manuscript:	ETHNOBOTANICAL SURVEY AND IN-VITRO ANTISICKLING EFFECT OF SOME SELECTED MEDICINAL PLANTS
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The paper was aimed at evaluating the antisickling effects of some selected medicinal plants. The topic interrogated in this study is very important</p> <p>The materials and methods section fall short in terms of describing analytic standards and protocols used in the study. Some of the important details are necessary to make the paper best suitable for publication (<i>please see the specific comments and suggestions in the actual manuscript in track changes</i>).</p>	
<b>Minor</b> REVISION comments	Minor revisions comments can be found in the actual manuscript in track changes.	
<b>Optional/General</b> comments	The author needs to check the scientific names writing style for plant species. Also check all references and ensure the consistency.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p> <p>The author should clarify here if there were no ethical issues involved. For example, what was the procedure followed to get approval from patients or health practitioners to collect the blood samples</p>
