

SDI Review Form 1.6

Journal Name:	Asian Journal of Research in Dermatological Science
Manuscript Number:	Ms_AJRDES_59323
Title of the Manuscript:	Nuclear Factor- kappa B (NF-κB) activation gene Single Nucleotide Polymorphisms (SNP) associated with the risk of psoriasis in Chinese Han people of Wuhan, Hubei Province.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The conducted study has a value and a good concept. It is known that in part, psoriasis is a genetic disease, and nowadays broad GWAS studies are conducted to determine polymorphisms of affected genes, which are mainly associated with immunological functions. This study aimed to find an alteration in genes connected with NF-κB, which is approved as an important part of innate immune system psoriasis pathogenesis. Study has a national meaning (applicable on Chinese people), but additionally could be interpreted as a part of a wider picture, or used for comparison with the other nations, respectively.	
Minor REVISION comments	In order for the text to be better understood and fluent, it is necessary to correct it according to the suggested sentence and grammatical constructions.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> The author mentioned including two minors in study (younger in age of 9 years, second not specified). I would like to know if authors obtained written informed consent from a child's parent? If they did, preferably it should be written in the part of the manuscript that is describing patients, in particular for children (parental consent).
