

SDI Review Form 1.6

Journal Name:	Asian Journal of Research in Nursing and Health
Manuscript Number:	Ms_AJRNH_67094
Title of the Manuscript:	Improving Depressive Mood Status and Activities of Daily Living for Older People of Long-Term Care Facilities
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link: (<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. Please explain in detail how to perform random grouping 2. The selection criteria used to determine the eligibility of subjects should exclude bedridden persons 3. The results show demographic information and group comparisons among them, there are differences in ADL, Gender, Marital status, Reasons for admission, and Financial status, and they are not comparable between groups 4. A little more sample size is better 	
Minor REVISION comments	<ol style="list-style-type: none"> 1. It is recommended to cite references from the past three years 	
Optional/General comments	<p>With the development of society, the problem of aging has become more and more serious. Many elderly people need to live in long-term care institutions. Due to the lack of family members and care, these elderly people are prone to depression. This study adopted a cluster of random controlled trials compared the effects of TEAS, CAEP, and PE on the depressive emotional state and ADL of the elderly, and provided nursing staff with a safe, non-invasive, theory-based nursing method to improve the depression of the elderly and improve their ADL capabilities. This is a very meaningful study.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
