PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The author starts that she/he developed the tool used in this study. Therefore the process of validating the tool should be described.</p> <p>The author should specify from which authority the ethical permission was obtained as it is not obtained from respondents.</p> <p>The interpretation of the findings should be consistent with the figures presented in the table.</p> <p>The discussion should be improved where the author compare and contrast the findings from this study to others.</p>	
Minor REVISION comments	<p>Nurses who were involved in the study should be called respondents rather than samples.</p> <p>It is better to write entire words than abbreviation, what is the meaning of GNM?</p>	
Optional/General comments	<p>This topic is very interesting and it showing how it is important for nurses to have knowledge on legal aspect regarding nursing. While the study aims to assess the effect of self-learning module (SLM) on knowledge regarding legal aspects of nursing care among nurses working in primary health centres(PHC), the results showed the increase on knowledge but not the effect of SLM such having nurses who become confident in protecting themselves against litigation.</p> <p>The author should address the provided comments to improve the quality of the manuscript.</p>
