General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is very interesting.The conditions for publishing the article are respected. There are clinical-paraclinical correlations.The data entered in the table and graphs are detailed.The article is original.	
Minor REVISION comments	I'm sorry, but I can't find bibliography number 13 included in the text.	
Optional/General comments	The appendix has lymphoid structure.Immune cell intervention may represent inflammation. The ulcer, I think, is induced by the reduced amount of secreted mucus, due to aggression on glandular cells.Pathology is due to the involvement of MALT and GALT.I'm considering the presence of pneumonia.Vascular lesions are specific, involving all mucous and parenchymal structures, including myocytes.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
