PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Abstract : some grammatical errors Method as baseline data why the severity of Covid 19 is not used as a basis for the risk of death : how about the age? Another Comorbid? Result: the author submits data repeatedly both in the form of tables, pictures and information with the same contents, they should choose the most informative one, in the results you should also tell how many surgeons are also exposed to Covid 19, as stated in the introduction. in the caption also include the original language not in English</p> <p>Discussion : why did the authors not compare number or incidence of emergency surgery with before the Covid era (previous year), so that there will be a difference, is the incidence of mortality in Covid 19 patients higher? Were the patient's cause of death due to the underlying disease is performed surgery or Covid 19? In the discussion the author explained the complications of Covid 19, but we did not find it from the results of his research</p> <p>Reference: there are some mistakes in writing or typing errors</p>	
Minor REVISION comments		
Optional/General comments
