

SDI Review Form 1.6

Journal Name:	Asian Oncology Research Journal
Manuscript Number:	Ms_AORJ_56954
Title of the Manuscript:	Cancer Implications of Heavy Metals in Swampy Agricultural Soils Across Kokona, Nasarawa West, Nigeria.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The sampling points were not exact, is it Kokona or Karu. Meanwhile the coordinates of the sampling points were clustered meaning it was in a particular LGA. Please be specific. Your sampling was done at two different times. Are the results in agreement? Please check.	
Minor REVISION comments	Page 3, "was" instead of "is" There is no unit on the parameters in Table 4. Page 8, line 10, "as" instead of "is" Reference 4 and 6, should be written in full	
Optional/General comments	The study area is an agricultural land, therefore a preliminary study of some Physicochemical parameters of the soil samples like pH, CEC, Organic matter content and particle size should have been carried out to ascertain the fertility of the soil in the area. Why the choice of XRF instead of AAS? When XRF is mostly used for the analysis of rock samples. The results of your research generally portray the concentration levels of these heavy metals in relation to their natural existence in this area and not as a result of a pollution or contamination issue. The title of your article would be better put as "Health Implications of Heavy Metal Concentrations in Swampy Agricultural Soils Across Kokona, Nassarawa West, Nigeria".
