<b>Compulsory</b> REVISION comments	Thank you for asking me to review the paper. The topic is important but the questionnaire validity is challenging as most of the questions not seems unsuitable.. like only limited numbers of participants were sexually active. How you can generalize findings from such small number of samples? Secondly, I do not have the knowledge of minimum sexual practice age in Ghana. It is quite surprising that children in between 10-19 years are sexually active and some of them have multiple partners. Almost 20% reported that they were in sexual relationship
