PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">In material and method section, the instrument used or methodology adopted for the measurement of 'traits' is missing. It should be elaborated to present a clear picture.Which statistical design was used for the analysis of the results?Why only 16 treatment combinations? What was so specific about 16?Where is Table 1 that is mentioned two times?There is a mismatch with the figure numbers.Where is the conclusion?	
Minor REVISION comments	<ul style="list-style-type: none">The similarity index can be reduced.References are not proper. There is no need to mention P before the page numbers.	
Optional/General comments	<ul style="list-style-type: none">Language can be improved. At certain occasions, it becomes hard to comprehend the study.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
