

SDI Review Form 1.6

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_59523
Title of the Manuscript:	Conventional Lathe Remanufacturing into CNC Machine Tool: Uncertainty Modeling Approach
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There should be a blank line between figures, tables and the text. There are grammatical and writing errors in the paper. There are multiple references in the paper with inconsistent intervals. Some pictures in the paper are too blurred. In the paper, there is a problem that the content of the table is separated, and the figure and figure number are separated. There are alignment issues in the paper. The author should explain the content of the corresponding parameters in the figure. In the paper, some figures have duplicate numbers.	
Minor REVISION comments	Are all the pictures in the paper necessary? For example, should all the weight figures be displayed in the form of a line chart.?	
Optional/General comments	Can you consider quantifying the contribution to cost savings	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
