<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"> <li>1. How did you collect data from these women when about 45% of them had primary level of education and below? Can they actually fill the questionnaires themselves?</li> <li>2. Rewrite methodology. Stating how BMI components were measured. Why did you leave out waist and hip circumferences, waist hip ratio and other anthropometric parameters?</li> <li>3. I cant find any mean and standard deviation in your table. Revisit the data analysis.</li> <li>4. Categorize BMI based on their age range. If possible postmenopausal and women of child bearing age.</li> <li>5. In your nutritional assessment, what are their staple foods. Generate a table to depict this if possible.</li> <li>6. How did you assess physical activities in the respondents?</li> <li>7. The discussion is scanty. Get recent articles and rewrite.</li> <li>8. You said in your conclusion.....starchy food was their staple food. What percentage of the respondent consume starchy foods.</li> <li>9. Check the Journal's preferred referencing style. ....? Vancouver. Only ref 8 is recent. Check for more recent articles and use them in your introduction and discussion sections</li> <li>10. If data are available/ possible, create a table for complications of oversight and obesity seen among the respondents. Did you examine them physically? If not, state those limitations you had on the field.</li> <li>11. State the ethical approval code for this study.</li> </ol>	
<b>Minor</b> REVISION comments	Few typographical errors should be corrected.	
<b>Optional/General</b> comments	Good write up.
