

## Review Form 1.6

Journal Name:	<a href="#">International Blood Research &amp; Reviews</a>
Manuscript Number:	Ms_IBRR_75468
Title of the Manuscript:	Association of H. Pylori with serum iron levels and some risk factors in children aged 1-12 years attending the Buea regional hospital.
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>1. Since the proportion of anemia in the population in this study is far higher than the <i>H.pylori</i> infection rate, it indicates that factors other than <i>H.pylori</i> infection have a great effect on the population's anemia; if the types of anemia are not stratified, the conclusion of a simple analysis is unreliable. 2. In discussion:" No difference was also noticed with the source of drinking water and infectivity with H. pylori among the children.", but in Table 1, P=0.011. The result is inconsistent with the conclusion.</b>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
