Compulsory REVISION comments	The manuscript has good data and has high potential for knowledge contribution. However, it was poorly written thus some of the description, explanation and discussion are not clear. Some part needs to be rearrange especially methodology. Most of the sentences need to be constructed (including some subtitles) and it is highly suggested that the authors send for proofreading to help improve the overall manuscript. Authors should pay attention to the journal requirement as the format inconsistency is noticeable (font size, small or capital letters, citation style, etc).
