Manuscript Number:	Ms_IJECC_58334
Title of the Manuscript:	Exploration of Knowledge, perception and adaptation strategies of the Mbita Fisher Community to CC/ CV.
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy> )

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>It is necessary to look for recent information from 2018, 2019 and perhaps 2020, in relation to the subject, since there is only one reference from 2017.</p> <p>You should review the entire document in detail, because there are paragraphs, where the period is necessary and the commas must be placed. Also, unify the references, regarding the placement of the parentheses and the order in which the year should be placed.</p> <p>Unify the size and font of the graphics.</p> <p>Review in detail spaces that should not be, for example, in the title after the diagonal, should not take space.</p> <p>In relation to figure 2, the map is not understood, there are two arrows, indicating something, which do not correspond to the study site. I had to look for the site and another map to get to know the place and relate it to the explanation.</p> <p>So, I suggest you put another map or indicate the study site. If possible, a relief map or another map, focusing on the country and the study site.</p> <p>In section 4.3.7. There are 4 images, which must be each with its explanation and not at the end.</p>	
<b>Minor</b> REVISION comments	<p>Regarding the title, I suggest that the country of the study site be placed. In other words: Exploration of Knowledge, perception and adaptation strategies of the Mbita, Kenya Fisher Community to CC / CV.</p>	
<b>Optional/General</b> comments	<p>I consider that it is an excellent work, where he explains in detail the community and the importance of gender today, in addition to vulnerability, of the climate. I hope that the criticism they make of the lack of support and communication, among others, improves. Unfortunately, apparently this is repeated in other parts of our planet, so we must be part of success stories, where now, not only do we know the problem, rather, we make known the strategies that are carried out.</p>
