

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_71893
Title of the Manuscript:	To assess the impact of insecticidal spray on leaf curling caused due to sucking pest and phytotoxic effect of higher doses of insecticides in chilli.
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1) The references in the manuscript and in the references list do not match. 2) The abstract does not clearly reflect the main findings and contains too much detailed information to highlight the main result of the research. 3) Some mistakes in the text have to be corrected (cilli <i>instead of</i> chili, Untreated control <i>instead of</i> Uncontrol, ...)	
Minor REVISION comments	1) Table 2 can be excluded from the manuscript as uninformative. It is well described in the text. 2) Tables in Materials and Methods must be numbered. 3) The same T3 notation in the description of Insecticidal spray effect on leaf curling and Phytotoxic effect creates confusion for understanding the results.	
Optional/General comments	In general, I agree with the scientific findings, but the form of the MS needs to be substantially revised. The results are presented too casually, more like a draft rather than a finished article.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
