PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>I strongly recommend this paper for publication to the journal.</p> <p>The aim of the paper is to investigate the dental caries in preschool children in Harare. The study design and the adopted methodology are well thought and discussed. The analysis is based on a representative sample of 220 subjects. The results indicate a high prevalence of DMFT and a lack of visits to dentists. Only 12.7% of the subjects visited a dentist. The results point out for public health intervention and the need prevented programmes and counselling.</p> <p>This is a useful paper, well-structured and well designed.</p> <p>It is recommended for publication</p>
