

Review Form 1.6

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_71595
Title of the Manuscript:	BACTERIOLOGICAL ASSESSMENT OF AUTOMATED TELLER AND POINT OF SALES MACHINE USER INTERFACE IN UYO METROPOLIS, NIGERIA
Type of the Article	Original article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>It would be convenient to clearly indicate:</p> <ul style="list-style-type: none"> - The main objective of the work. - Microbial isolation methods. - Microbial seeding techniques. - Counting method. - Statistical analysis (there must be coherence between the different sections, see comments on the abstract). <p>- Indicate morphological, cultural and biochemical characteristics that determined the identification of the bacterial isolates.</p>	
Minor REVISION comments	<ul style="list-style-type: none"> - Improve the wording of section 2.1 Source / Collection of Samples (See comments in the manuscript). - Indicate the microbial counting method used. - In addition, it could be expressed whether the microorganism is resistant, intermediate or sensitive, according to the results of the antimicrobial susceptibility tests by diffusion from the disk as a function of the diameter of the zone of inhibition. - Briefly characterize these seasons (average temperatures, rainfall, relative humidity, time of year, etc.) 	
Optional/General comments	<ul style="list-style-type: none"> - Use the same font. - The percentage of occurrence of unidentified bacterial strains was estimated? - Only human pathogenic bacteria were isolated and evaluated? - Not all species of the genus Pseudomonas are human pathogens. - Add the web: www.clsi.org, in reference 17. - In the manuscript I make some comments to improve the article. - In the bibliographic references the punctuation should be checked. 	

Review Form 1.6

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
