

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_54276
Title of the Manuscript:	Traffic congestion in mobile networks
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. For the introduction part, the expression is very refined, but the structure is a bit confusing. The introduction should include in proper order the research object, practical application, research status (literature review), problem formulation, research content, and so on. 2. In the introduction, there is no description of the research status on the congestion of flows, and the author is suggested to supplement it. 3. Part 2, Part3, Part4 and Part5 introduced briefly four algorithms and protocols for the management and control of congestion. For each method, should first introduce application object, use condition, then theoretical basis (definition, formula, advantages and disadvantages), finally, causes of problems and methods of resolution. 4. For each method, no example is used to verify the proposed solution. 	
Minor REVISION comments	<ol style="list-style-type: none"> 1. The title cannot reflect the specific content of the study, suggest rephrasing the title. 2. For the references, there is no recent papers (2017-2020). Please check the recently publication and finish your literature review again. 3. For each method, in order to make readers understand better, it is suggested to add corresponding pictures to explain. 4. For English language and style, moderate English changes are required. Please improve your English expression. 	
Optional/General comments	The main content of this paper introduce several algorithms and protocols for the management and control of congestion in mobile networks. In order to improve the quality and readability of the paper, the corresponding modifications are recommended.
