PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Literature is still not recent. Authors seem to have a challenge to get literature which is less than 5 years atleast. Indigenous Knowledge Systems have grown and developed and are being shared across board. This is essential for qualitative studies.</p> <p>The study does not mention diseases curable through these means and does not show whether this applies elsewhere.</p>
