SDI Review Form 1.6

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>I do not understand why the division of female male patients should be quoted, when the results do not analyze at all the gender relationship with the measurements performed for the purpose of the study.</p> <p>I do not understand why 18 years was the age limit, when we know that adolescence according to WHO data lasts up to 19 years.</p> <p>Exclusion criteria should also include adolescence, as we know that hormonal changes cause sulcus depths greater than 5mm.</p> <p>Exclusion criteria should also exclude patients with generalized gingival infections of viral, fungal, bacterial origin.</p> <p>The strength of the study is the methodology, but I see gaps in the results. data analysis highlights a p value that I do not see applied to the results. out of 210 samples taken from 70 patients, I do not understand the results of table 1 with total figures 100 ????</p> <p>The <u>World Health Organization</u> (WHO) defines an adolescent as any person between ages 10 and 19. This age range falls within WHO's definition of <i>young people</i>, which refers to individuals between ages 10 and 24.</p>	
<b>Minor</b> REVISION comments	<p>The exact reference to Mirhoseini et al is missing from the discussion.</p> <p>In the methodology section, indexes by authors are written in capital letters and precise lettering with appropriate symbols</p>	
<b>Optional/General</b> comments
