**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>This is a timely and important study and I agree there is little known about prevalence use of licit and illicit substances among teenagers and college students. However, there are few things need no be highlight by the author:</p> <ol style="list-style-type: none"> <li>1)I suggest to review the entire manuscript with the term suggested in DSM-V and avoid using word which can be seen as 'stigmatizing language' eg: 'drug use, 'drug addict' etc.</li> <li>2) In the result sections. The author only uses the descriptive analysis rather than analysed with more advance analytical method such. Suggest to find a correlation or prediction between demographic profile with substances use among respondents.</li> <li>3) The author had well described the limitation of the study, however incorporate with the suggestion for the future study may help the reader to plan for next research.</li> <li>4) This study was fully utilized questionnaires for data collection methods. Kindly can the author provide the psychometric validation profile for the questionnaire use in the study. Please mention those psychometric validation value in your manuscript.</li> <li>5) Kindly, can the author described and please mention in the manuscript how was the sample size being calculated?</li> </ol>	
<b>Optional/General</b> comments
