

**SDI Review Form 1.6**

Journal Name:	<a href="#">Journal of Advances in Medicine and Medical Research</a>
Manuscript Number:	Ms_JAMMR_67218
Title of the Manuscript:	Risk of bleeding in patients with chronic kidney disease undergoing bronchoscopy
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy> )

**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"> <li>• It is a very novel investigation that contributes advances of knowledge for its field.</li> <li>• The methodology is adequate for the purpose of the study and is clearly explained to make the results known.</li> <li>• The results are significant and are presented in an adequate and understandable way through narration and representation of the information in tables.</li> <li>• The conclusions are comprehensive, relevant, and appropriately related to the objectives.</li> <li>• I suggest to include in the discussion section comparative results of more similar studies.</li> <li>• Is very important for this research add more recent bibliography as well as include more international bibliography.</li> <li>• Include in the section of introduction/background similar studies.</li> <li>• To add more information about bronchoscopy (from when it began to be used, who invented it, advantages, etc.).</li> </ul>	
<b>Minor</b> REVISION comments	<ul style="list-style-type: none"> <li>• I recommend add relationship between the application of diagnostic techniques and the presence of complications from other studies.</li> <li>• Mention in the rate of bleeding complications whether it is worldwide or international.</li> <li>• Group the data into a table for classification severity of bleeding and for stages of chronic kidney disease; Mention the name of the scale in each table with its bibliographic reference.</li> <li>• Indicate in inclusion or exclusion criteria whether or not pediatric patients were included.</li> <li>• Annex in material and methods procedure used for authorizing the conduct of research in the institution.</li> <li>• Add biographic reference for each definition (chronic kidney disease, bronchoscopy and hemorrhage).</li> </ul>	
<b>Optional/General</b> comments	<ul style="list-style-type: none"> <li>• If it is possible to add in the analysis of the study operated lung segments and type of anesthesia.</li> <li>• Good distribution of variables.</li> <li>• The research has good statistical analysis.</li> <li>• Excellent sample size to represent results.</li> <li>• Good structure when correlating different stages of chronic kidney disease and the risk of bleeding.</li> <li>• The title of your research is according to it.</li> <li>• This research would represent very useful for better management during medical practice.</li> <li>• I want to thank you for your desire to contribute to science.</li> </ul>
