**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The authors should include a brief account of rationale of the study, In addition, author should cite some recent literature in the introduction and should be rewritten. Keyword should be written. Dose of standard and test drug is not mentioned. IAEC Protocol number should be given. Number of animals used were less as high mortality is seen in Streptozocin induced group. The Discussion is too presumptive.</p> <p>Conclusion:- This section should be improved. Authors should explore molecular mechanism of polyherbal capsule in inflammation. Recent references should be cited</p> <p>I strongly recommend the authors to proofread the manuscript. Hence, unless the authors make significant changes to their current manuscript it fails on the novelty aspect and hence cannot be accepted for publication.</p>
