

**SDI Review Form 1.6**

Journal Name:	<a href="#">Journal of Geography, Environment and Earth Science International</a>
Manuscript Number:	Ms_JGEESI_56237
Title of the Manuscript:	Lithofacies, Palynostratigraphy and Paleocology of the Outcropping Rock Succession at Ogbunike Toll gate, Niger Delta Basin, Nigeria
Type of the Article	

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The article presents errors between periods and geological epochs, as shown in figure 2. In addition, there is confusion in the text about this subject, when the author talks about Eocene, for example.</p> <p>Figure 1 is terrible, the reader can't read anything.</p> <p>The results are good and consistent, but the discussion is poor. There are several articles, including in tropical areas, that talk about these foraminifera, leaving the discussion more attractive and stronger.</p>	
<b>Minor</b> REVISION comments	<p>The photo of the blades is of low quality, it would be good if authors presented the photos better.</p> <p>The results are more than 6 pages long, while the discussion is 1 page long. This is discrepant. The article could get better if the authors invested in the discussion</p>	
<b>Optional/General</b> comments
