FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The article has been slightly improved with several new sentences. However, referring to Wikipedia, in a scientific article, I think is a bad solution. Figures 5, 6 and 7 have not been corrected. In general, the authors have improved the manuscript, but I am not convinced of its scientific value. I leave the final decision about acceptance or rejection to the Editor.</p>
