**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The topic of the article is interesting. It provides an overview of the role of the HSP27 protein in the pathophysiology of several diseases. The text is well written, good and current references.	
<b>Minor</b> REVISION comments	I suggest changing the title of the article. The term "VARIOUS AILMENTS" became very broad, a more succinct title would be better placed.	
<b>Optional/General</b> comments	There are a large number of figures, figures 2 and 4 could be removed, it would not cause damage.	

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
