PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Clear and highly relevant study for the world scientific community. I missed some aspects of the way in which the manuscript was built (materials and method). I suggest restructuring the abstract, adding the work methodology to the body of the study as well.	
Minor REVISION comments		
Optional/General comments	As it is an introduction, I think it is inappropriate to add figures in this topic, but it is a suggestion, since they clarify the reports present in the topic. As figuras estão em formato adequado e de qualidade coerente.
