

SDI Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_66763
Title of the Manuscript:	STUDY OF EXPRESSION OF p53 IN PROSTATIC LESIONS
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. Serum PSA values of the patients included in the study were too high. Authors should explain the reason for this in the article. The probability of bone metastasis and poorly differentiated tumor is high at serum PSA values > 20 ng / ml. However, in the present study, it was stated that the majority of cases were moderately differentiated tumors (in the discussion section).</p> <p>2. Whereas the section on the incidence of prostatic lesions is too much in the discussion section of the article, more discussion can be included in the light of current articles on P53 expression.</p> <p>3. The references are old and should be updated.</p>	
Minor REVISION comments		
Optional/General comments	1- Figure numbers may be reduced.
