Title of the Manuscript:	EFFICACY AND SAFETY OF TOPICAL CALCIPOTRIOL PLUS BETAMETHASONE DIPROPIONATE VERSUS TOPICAL BETAMETHASONE DIPROPIONATE ALONE IN MILD TO MODERATE PSORIASIS
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. Please rewrite the abstract. Only introduction and methodology found in abstract. 2. At the methodology part, 'Randomization' and 'Laboratory investigations' parts were not clear. Please explain in detail. 3. At the results and discussion part, the two treatments can be combined together. For example, figure 1 and figure 5 can be put in one frame. Place the two pie charts in one figure, can see the difference between two treatments easily. 4. Please include limitations of the study in the results and discussion part. 5. Most of the references were outdated. It is better choose the references within 5 years (2017-2021). 6. Please send the manuscript for English proofreading. 	
Minor REVISION comments		
Optional/General comments
