Compulsory REVISION comments		
Minor REVISION comments	Authors have selected good topic. However, I have some concerns need to clarify by authors. In section 4, authors did not provide sufficient information about most of the models discussed and its way of writing is not attractive as it is very important to attract the readers. The caption figure 1 is not very clear. Authors need to check plant names in the manuscript as it should be in italic and there should be gap between genus and species. Authors need to check English grammar and spelling errors in the revised manuscript.	
Optional/General comments
