PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I do not have any compulsory comment.	
Minor REVISION comments	Advise to add recommendation for 'further study'. COVID-19 is a new disease and has created a global pandemic. It has no precedence. So recommendation for further study is to be there at the end of the conclusion. Here it is open where to start the further study. However, narrowing down the field is also a valuable research. One possible field for further study is the relationship between COVID-19 and environmental pollution.	
Optional/General comments	The article has been written in a good way. It has touched almost all the related topics. Environmental pollution is not only important for this case, it is also important in other cases that may come in future. One strategy that should be for the researchers is "prevention is better than cure".	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
