PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This case report is not a unique one, but it may be considered for publication if the author re-write the paper using current style of the English Language. There are too many uncommon words used which makes reading rather odd. Clearly many sentences can be written in simple and plain English. There are several grammatical errors throughout the write-up which requires editing by an English expert.</p> <p>Examples: ..'dispensed in the emergency hours' could be 'the patient was seen in the Emergency Department with preterm labour at 27 weeks gestation'. 'Blood enquiry' should be blood investigations. 'outranged' - an ultrasound examination was done</p> <p>Abstract: Contents are satisfactory but there is a need to revise with regards to English Language. Case Report: Recheck grammar and the section should be written in simple English. Conclusions: Acceptable</p> <p>Fig. 1: Delete maternal left and refer to the fetus</p> <p>References: The authors have been employing APA style in the text and mixed styles in References section. Kindly employ Vancouver style throughout the text.</p>	
Minor REVISION comments	The text needs to be edited so that simple English is used and all sentences are seen to be grammatically correct.	
Optional/General comments	The contents are acceptable. Need to be revised according to comments made above.	

Review Form 1.6

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
