PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Diabetes, a chronic disease resulting from defects in glucose uptake and utilization by cells, manifests its self through multiple organs malfunctioning among which, the eyes. The present review highlights common visual malformations associated with diabetes while stressing the need for their early diagnosis and treatment as vital prognostic factors for post-operative cataract surgery in diabetic patients. Work is timely, but language of communication is sub-standard, rendering the text flawed. There is thus the need to thoroughly revise the text for coherence.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
